EMBL-EBI

Hinxton, Cambridgeshire

United Kingdom.

March 26th, 2020.

Dear HR,

I am writing to express my interest in the Software Development job at EMBL-EBI. I learned about the institute through a friend and was impressed by the idea of working with people that are currently at the edge of today's science development.

I recently graduated at Inatel - Instituto Nacional de Telecomunicações - in Santa Rita do Sapucaí, Minas Gerais, Brazil, in Computer Engineering. During college I had experience in software development and with technologies that could be useful when working with you.

Among my experiences are building crawlers to get some public data, like tables, weather, or even legal processes, as well as game development working with Unity 3D.

During college we were encouraged to work in groups and present results in front of other students. On previous internships I also worked with other people implementing functional requirements in order to code a bot. As a computer engineer, I can work with data processing using Python, just like most part of my previous works.

Now that I am graduated, I hope to do meaningful work in order to acquire knowledge, experiences and get a Masters in Computer Science.

I would like the opportunity to meet with you and discuss this job opportunity. Please let me know if you have any questions or would like to speak with me. You can reach me by email at giovannipimenta@gec.inatel.br or by my phone +5535992650666.

Thank you for your consideration.

Sincerely,

Giovanni Pimenta.
